

Data Visualisation: Empowering Business with Effective Insights

TATA Forage Virtual Job Simulation

Completed by **Vidit Raj Singh** ·

IILM University Greater Noida ·

B.Tech Computer Science & Engineering(Data Science)

About TATA & Forage Platform

A Global Leader in Innovation

TATA is a global conglomerate known for innovation, engineering excellence, and digital transformation across industries including IT, consulting, and business solutions.

Forage by TATA provides immersive virtual job simulations that bridge academic learning with real-world professional experience, enabling participants to develop industry-relevant skills through role-based challenges.

Industry Exposure

Understand real business challenges and professional workflows in data-driven decision-making

Practical Application

Apply data visualization techniques to transform raw data into actionable business insights

Professional Development

Build communication, analytical thinking, and problem-solving competencies valued in modern organizations

Candidate & Program Overview

Candidate Details

- Student Name: Vidit Raj Singh
- Roll Number: 25SCS1003002980-2CSE26
- Degree: B.Tech (Computer Science & Engineering) - Data Science
- Academic Batch: 2025-2029
- University: IILM University, Greater Noida, U.P.

Simulation Profile

- Program Name: TATA Forage Virtual Job Simulation
- Specialization Domain: Data Visualisation & Business Analytics
- Duration: 3-4 Hours (Self-paced)
- Completion Date: August 26, 2026

Core Simulation Objectives

1

Data Analysis & Interpretation

Develop skills to explore datasets, identify patterns, and extract meaningful insights from complex business data.

2

Visualization Design

Master the art of translating data into compelling visual narratives that communicate insights clearly to diverse audiences.

3

Business Storytelling

Learn to frame data insights within business context and communicate recommendations that drive strategic decisions.

4

Professional Communication

Develop presentation and documentation skills to articulate findings effectively to stakeholders and decision-makers.

Industry Challenge & Solution Scope

The Challenge

Organizations generate massive volumes of data daily, but struggle to extract meaningful insights and communicate findings effectively to stakeholders. Poor data visualization leads to missed opportunities, inefficient decision-making, and competitive disadvantage.

The Simulation Approach

This virtual job simulation provided hands-on experience in transforming complex datasets into clear, compelling visual narratives that drive business impact.

- **Identify** business problems hidden in data
- **Explore** datasets to uncover patterns and trends
- **Visualize** insights using effective design principles
- **Impact** stakeholder decisions through clear communication

Simulation Tasks Timeline

A comprehensive overview of all four tasks in the virtual job simulation, structured as a sequential learning journey:

Task 1: Framing the Business Scenario (30-60 mins)

Learn to think from a business leader's perspective and prepare strategic questions for senior executives.

1

2

Task 2: Data Exploration & Analysis (45-75 mins)

Clean, analyze, and uncover patterns in complex datasets to identify key business insights.

3

Task 3: Building Effective Visualizations (60-90 mins)

Design interactive dashboards and compelling visual narratives using Power BI or Tableau.

4

Task 4: Presenting Insights to Leadership (45-60 mins)

Communicate findings and recommendations to executives, driving informed business decisions.

Total Duration: 3-4 hours | **Self-paced** | **Intermediate Level**

Key Takeaways & Skills Gained

This simulation reinforced critical competencies for modern data professionals:

Strategic Thinking

Understanding business context before diving into data analysis—asking the right questions shapes better insights.

Technical Proficiency

Hands-on experience with real datasets, cleaning workflows, and industry-standard visualization tools (Power BI, Tableau).

Communication Excellence

The ability to translate complex data stories into clear, actionable recommendations that drive executive decision-making.

Problem-Solving Mindset

Structured approach to identifying business challenges, exploring data systematically, and delivering measurable impact.

Why This Matters

In today's data-driven economy, professionals who bridge the gap between technical analysis and business strategy are invaluable. This simulation provided authentic exposure to that intersection—preparing for real-world challenges in data analytics and business intelligence roles.
